

# CHASE CampSec

Operations and Incident  
Management Software

## CHASE CampSec Modules

- Operations & Incident Management
- Traffic & Parking Management
- Lost & Found Management

**CHASE CampSec** is a web-based platform comprising modules that allow multiple users to log, analyze, manage and report on Incidents in the areas of Security, Traffic, Lost & Found, Maintenance and Health & Safety. The software is accessible from any secure Internet connection, therefore streamlining multisite Incident Reporting, Management and analysis through a single data entry interface.

### Operations & Incident Management Module

*Security, Maintenance and Health & Safety Control made easy through efficient Incident and Investigation Management!*

*10 Seconds to Safety!* - The quick and easy 10 Seconds to Safety Incident Logging module replaces the traditional manual paper-based methods and enables effective procedure enforcement through the Automated SMS & Email Notifications Module as well as pre-defined Standard Operating Procedures.

#### Relevant Sub-Modules

- Incident Logging Module
- Standard Operating Procedures Module
- Automatic SMS & Email Notifications Module

*If you can't measure it, you can't manage it!* - Highly efficient and yet user-friendly Incident and Investigation Management modules that come standard with **CHASE CampSec** allows for an efficient Incident, Case and Investigation Management process. Instantaneous reporting ensures accurate Trend Analysis and educated decision making on real-time events.

#### Relevant Sub-Modules

- Incident / Case Management Module
- Investigations Module
- Standard Reports

*Maintenance and Health & Safety Control made easy!* - You can now effectively manage any reports of Maintenance and Health & Safety non-compliances by pre-defined SOPs and improved reporting protocols!

## Traffic Vehicle Permitting and Parking Violation Management Module

*What is Traffic?* - The Traffic management tool allows the user to issue campus parking permits and manage any information or payment transactions related to parking and campus parking violations.

*Why Traffic?* - Traffic will act as an efficient set of tools for the University to:

- understand student parking requirements
- manage student parking permitting
- keep record of the income generated from parking permitting
- manage campus parking violations through an effective ticketing and summons process
- manage staff parking

## Lost & Found Lost Property Management Module

*Purpose of Lost & Found Management Module?* - The main purpose of the Lost & Found Management Module is to provide a centralized database for all reported lost property and property found on campus.

- log lost and found property into a central database
- manage claims and distribution of property
- move items for sale or donated to charity automatically
- keep record of the income generated from sales
- complete audit trail of property reclaimed, sold or donated

## Implementation, Support and Data Security

*Simple implementation!* - Through the thorough BRS (Business Requirement Study) conducted with each Campus by Sukema Integrated Solutions, the implementation process for the University is a breeze. All data that resides within the system is obtained during the initial BRS and programmed into an empty template of **CHASE CampSec** by Sukema.

*Easy Support!* - The recommendation is always for **CHASE CampSec** to be hosted with Sukema Integrated Solutions. Thin client architecture allows quick and easy version upgrades, data backups and maintenance without having an effect on system access for long periods of time. Sukema Integrated Solutions will communicate any planned downtime accordingly.

*Secured Data!* - Data security is guaranteed at all times.

## Client Testimonials

"Since its implementation 9 years ago, the CHASE system has been invaluable in simplifying, saving time and managing our administrative tasks within Security, Traffic, Health & Safety and Lost Property departments."

*Roland September - Traffic Transport Manager*

"The CHASE system has speeded up our processing of parking discs considerably. On

the old system, only one person could work on it, and to complete an average of 20 000 discs per year, working on it all day 5 days per week it took approximately 50 weeks to print all the discs. Now we are able to print all student discs at Registration and we are able to print staff discs well ahead of schedule."

*Tracy Ebel - Section Head, Space & SAPSE*

"The CHASE system has enabled us to effectively collate and

manage important Security related information in real time from all of our 6 Campuses spread across the Peninsula. Prior to the CHASE system implementation, this was a huge problem and took days of work to try and achieve something remotely similar".

*Stan Dennis - Senior Director, Technical Services*
